Express Auth 2FA

David Richards

November 15, 2018

Setup Express App User Reg & Login
Use passport.js strategies

1. <u>nodejs.com</u> Install node.js

2. Install Express : npm install -g express-generator

3. Create project directory using express generator: express - -view ejs - -git cftw_userAuth

4. CD into project directory

5. Npm install

6. Npm start

7. Browser: localhost:3000

8. Npm install nodemon -g

9. Open VSCode and add project folder to editor

10. From terminal (command line) npm install

- mongoose
- passport
- passport-local
- bcrypt-nodejs
- express-session
- morgan
- body-parser
- connect-flash
-
-

11. mkdir db

12. mkdir models

13. mkdir config

14. mkdir routes

15.

16. Edit package.json to change "node <project_name> to "nodemon <project_name>"

17.
